Company Overview

Lingotek | The Translation Network gives enterprise business customers new ways to engage their global communities by providing trusted, rapid translations to expand and grow business in a cost-effective way.

Integration Overview

Lingotek | The Translation Network and leader in collaborative translation solutions announces that *Lingotek - Inside for Oracle WebCenter Sites* is now integrated and interoperable with Oracle WebCenter Sites.

- Users can translate, localize, update, and publish global content within a single, uninterrupted workflow. As a result, workflows are accelerated, and the globalization of content becomes faster and more streamlined. Oracle WebCenter Sites gives enterprises the ability to easily create and manage different types of content across multiple channels, including social media. The entire process of authoring, publishing, targeting, optimizing, and personalizing Web content is automated. Lingotek augments Oracle WebCenter Sites by making the management and manipulation of content a global experience. With Lingotek's best-in-class machine translation solutions and real-time community translation and professional translation services, users can integrate translation into their Oracle WebCenter Sites workflows. *Lingotek – Inside for Oracle WebCenter Sites* features include: Machine translation technology quickly translates documents or any page on your site.
- Lingotek's Workbench allows bilingual users to volunteer to translate content easily and quickly. Even non-professional translators can create quality translations using Lingotek's innovative suggestion and automation technologies.
- Users can nominate any page for translation to save money by only translating the content that's most important.
- All these powerful features are integrated directly inside Oracle WebCenter Sites.

Validated Integration

Oracle WebCenter

Through the Oracle PartnerNetwork, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

Integration Details

The *Lingotek – Inside for Oracle WebCenter Sites* provides the ability to translate content without leaving Oracle WebCenter Sites.

Availability

sales@lingotek.com

The integration allows customers to take advantage of various workflows when translating Oracle WebCenter Sites content, whether it be machine translation, community translation, or professional translation, or a mix of any of the workflows.

The integration also allows customers to manage adds and changes to Oracle WebCenter Sites content by automatically placing content back into a workflow for translation when changes are made to a master or parent Web page, thus keeping multilingual Web content in synchronization.

The integration is built around Lingotek’s Restful APIs and was written by Tony Field from Matastratus.
