

Inside Solution Sheet for **Drupal** + **Lingotek**

International companies need to translate their content to successfully expand globally.

Their content is continuously being changed and updated. Without a corresponding continuous translation model, multilingual content will not be in sync.

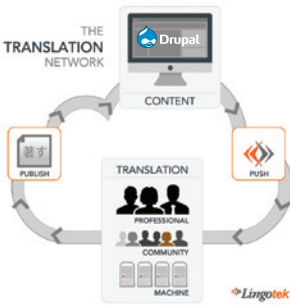

Questions

- Do you have existing translation needs?
 - Are you interested in a flexible and automated translation process?
 - Would you like to have your translation process linked into Drupal?
 - Would you like full visibility into the progress of your translation?
 - Would you like your content to be in sync across all languages?
-

Lingotek and Drupal

- Increase customer satisfaction by presenting websites in your customers' language
- Decrease translation costs by translating content Inside Drupal
- Better support and enable your international partners and customer service employees
- Expand your presence into new languages which were previously cost prohibitive
- Supports existing editorial workflows
- Supports Workbench Moderation
- Integrates with Alfresco content workflows
